

My New Liver

INCREASE AWARENESS OF LIVING LIVER
TRANSPLANTS TO SAVE LIVES

**Hi, we are
the Father-
Daughter
team, Simon
and Cassie.**

Cassie was born in 1997 with a congenital liver disorder called Biliary Atresia which has no cure. At 6 weeks old, Cassie had the life-saving Kasai procedure. She was blessed with 13 years before she ultimately needed a liver transplant. There is a tremendous organ shortage for transplantation. Every day, about 22 people in the United States die while waiting for an organ transplant. Simon was able to be a living liver donor for Cassie so she can have a second chance in life.

The miraculous regenerative power of the liver means every health person has the power to save another person's life, if only more people became aware of this awesome fact, thus the birth of My New Liver.

**We can
talk
about...**

- Why we decided to launch My New Liver
- Organ donation shortage & living liver transplantation
- The miraculous regenerative power of the human liver
- Medical health system and insurance insights
- Cassie's (recipient) pre and post-transplant experience
- Simon's (donor) impetus to launch his successful start-up
- My New Liver missions and services to help others
- Our personal journey leading to empathy and connection
